

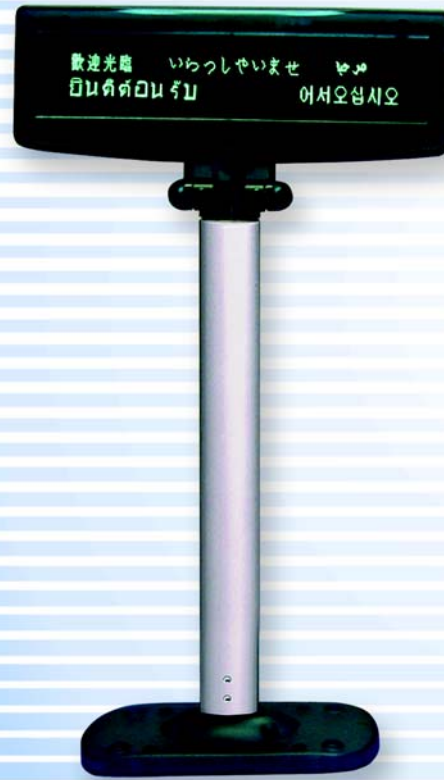

Graphic-Character VFD Display

VFD-1615 Series

TYSSO®

Insist on the Best

VFD-1615A

VFD-1615B

Innovative VFD Customer Display

It is the first VFD display in the world to show graphic characters by using the innovative VFD 16 x 15 dot matrix technology. With the new technology and Fametech's engineers' efforts, displaying the graphic characters on the VFD becomes feasibility.

FEATURES

- Capable of showing Chinese, Japanese, Korean, Thai, Arabian and other languages
- Available in 3 housings and customized colors
- Pass-through function to lessen cable connection
- VFD display with 20 characters x 2 lines, all characters are formed by 16 x 15 dots
- The display performs window, time counter, brightness adjustment, marco and more functions
